Response to Amendment

1. Applicant's amendment filed 09/06/2005 has been entered and carefully considered.

Claims 1, 8, 9, have been amended.

Reasons for Allowance

2. Claims 1-19 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

Please see the previous office action and applicant's argument filed on 04/18/2005 and 09/06/2005.

Regarding claim 1, none of the prior art of record teaches or suggests the combination of a method for monitoring a process, wherein the method comprising: repeatedly acquiring at least two different pieces of information of the process; performing a main component transformation due to the acquired information without using information acquired prior to the monitoring method, for calculating a main component measurement vector in a main component space; calculating a process indicator quantity by using the calculated main component measurement vector and one or several previously calculated main component measurement vectors; and detecting an end of the process by using the process indicator quantity. It is these limitations as they are claimed in the combination with other limitations of claim, which have not been found, taught or suggested in the prior art of record, that make these claims allowable over the prior art.

Regarding claim 9, none of the prior art of record teaches or suggests the combination of an apparatus for monitoring a running process, wherein the apparatus comprising: acquisition means for repeatedly acquiring at least two different pieces of information of the process; means for performing a main component transformation due to the acquired information, whereby a main component measurement vector is calculated in a main component space; and evaluation means for calculating a process indicator quantity by using the calculated main component measurement vector and one or several previously calculated main component measurement vectors, wherein the evaluation means is further formed to detect an end of the process by using the process indicator quantity. It is these limitations as they are claimed in the combination with other limitations of claim, which have not been found, taught or suggested in the prior art of record, that make these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
